PERSONAL PROJECTS

Shipment Tracking (Full Stack) (06/2023 - 08/2023)

- Led a project focused on tracking shipments, enabling the creation, editing, and deletion of shipment records. Streamlined the admin portal for assigning shipments to drivers and tracking shipment status, and enhanced the driver portal for updating shipment details in real-time. Technologies used: NextJS, Typescript, Next AUTH, Postgres.

Dignitymedicaltraining (Full Stack) (06/2024 - 08/2024)

- Built an online course enrollment platform where users can sign up for courses, access learning materials, and complete lessons. The platform integrates a payment gateway for seamless transactions. Additionally, admin and instructor dashboards are developed for managing courses, users, and progress tracking. Technologies used: NextJS, Typescript, Next AUTH, Postgres, Stripe, PayPal Gateway.

Firkki Website (Full Stack) (07/2024 - 09/2024)

- Developed a dynamic eCommerce platform showcasing decoration items and home textiles. The website features server-side rendering (SSR) with Next.js to enhance performance and SEO. Implemented robust authentication and authorization mechanisms using Node.js and Postgres to ensure secure user access. Technologies used: Next.js, SSR, Node.js, Postgres, HTML5, CSS3, and JavaScript.

OM ERP LOGISTICS DESIGN (08/2023 - 01/2024)

- Directed a logistics chain management system project, streamlining customer and hub operation portals to facilitate user and team management of package shipments with ease. Integrated comprehensive features for both basic and advanced shipment tracking. Technologies used: HTML5, CSS3, Bootstrap, jQuery, JavaScript, DOM Manipulation.
